DETAILED ACTION

Specification

The disclosure is objected to because of the following informalities: The specification is missing the proper headings, e.g. BACKGROUND OF THE INVENTION, SUMMARY OF THE INVENTION, etc. Appropriate correction is required.

The abstract of the disclosure is objected to because it contains implied language, e.g. "The present invention." Correction is required. See MPEP § 608.01(b).

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

Art Unit: 3733

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Klaue (US Patent Number 4,705,027).

Klaue disclose various embodiments of a medullary nail device for fixation of bone fragments at bone fractures comprising a medullary nail, e.g. 10, wherein the medullary nail is insertable into holes, e.g. 105 (see figures 4 and 5) in the bone fragments, e.g. 101, a locking means, e.g. 2a, having a hole (see figure 1), a transverse hole, e.g. 8, and a snap-in device having two elastic jaws defining a gap, wherein the outer parts of the gap are wider than the locking means (see figure 23).

With regard the statement of intended use and other functional statements, they do not impose any structural limitations on the claims distinguishable over Klaue, which is capable of being used as claimed if one so desires to do so. *In re Casey*, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 136 USPQ 458, 459 (CCPA 1963). Furthermore, the law of anticipation does not require that the reference "teach" what the subject patent teaches, but rather it is only necessary that the claims under attack "read on" something in the reference. Kalman v. Kimberly Clark Corp., 218 USPQ 781 (CCPA 1983). Furthermore, the manner in which a device is intended to be employed does not

Application/Control Number: 10/509,609

Art Unit: 3733

Page 4

differentiate the claimed apparatus from prior art apparatus satisfying the claimed

structural limitations. Ex parte Masham, 2 USPQ2d 1647 (1987).

Conclusion

The prior art made of record and not relied upon is considered pertinent to

applicant's disclosure. See PTO 892 for art cited of interest.

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Annette R. Reimers whose telephone number is (571)

272-7135. The examiner can normally be reached on Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Eduardo Robert can be reached on (571) 272-4719. The fax phone number

for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system; see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a

USPTO Customer Service Representative or access to the automated information

system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
